

# *"Citizens Caring for Water Resources"*

State NPS Meeting September 18, 2014

- Rick Fields
- Kristin Higgins
- \*Mike Daniels
- Karl Vandevender
- Tom Riley
- Katie Teague
- Special Thanks to John Pennington

# What is the AWS Program?

AWS is a multi-agency project intended to:

- Increase participants awareness and knowledge of their watersheds and local water issues.
- Help participants become leaders in their community
- Motivate participants to facilitate local efforts in their watershed
- Improve & protect quality of local water resources

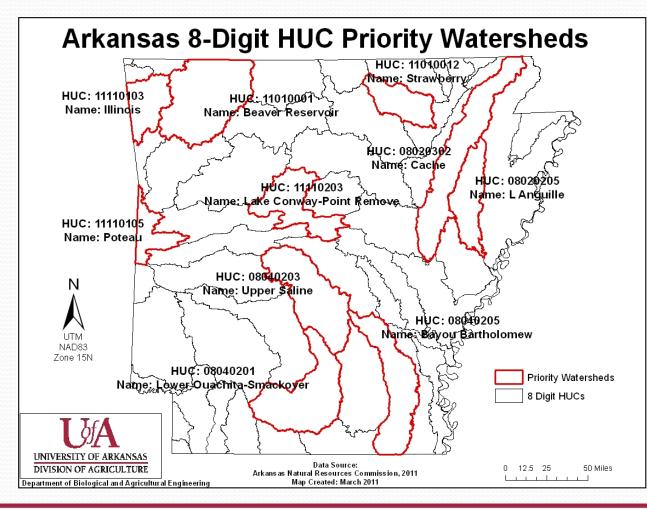

## **Priority Watersheds of Arkansas**

## **AWS Program**

- Targeting 8 impaired watersheds in Arkansas
  - Involves 47 Counties
  - AWS project goal is to reach 200 people

# **Major Tasks**

- Form Advisory Committee
- Develop Guide and Training Program
- Deliver Training in 8 impaired
  - watersheds in Arkansas

# Agencies/ Organizations On Advisory Committee

- ANRC
- UACES
- USGS, ADEQ, AACD, ADH, AFC, IRWP, LFWP, BWA, OWW, AWRC, CAW, BWD, ASU, WCRC
- EPA

#### • A Super Big Thanks to these groups and the Individuals who served

#### **Importance of Advisory Committee**

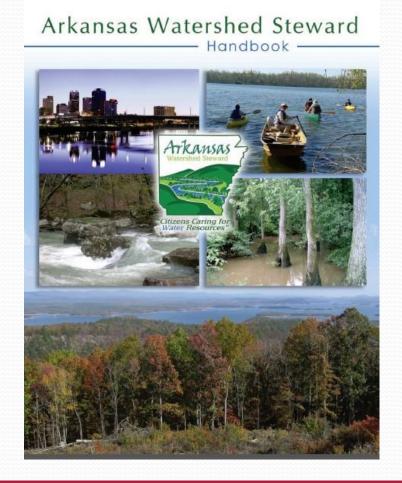

- Diverse perspectives that can be utilized to reach a potentially diverse set of watershed stakeholders
- Consensus Building
- Imparts Ownership beyond project team to other valued partners
- Reinforces Partnerships
- Partners help with outreach
- Helps with information gathering and expertise identification

#### **Arkansas Watershed Steward Handbook**

- Module 1
  - Program Introduction
- Module 2
  - Overview of watershed systems
- Module 3
  - Overview of Impairments
- Module 4
  - Managing to improve watershed function
- Module 5
  - Community driven watershed Protection

#### Module 2: Overview

Citizens Caling fo Water Resources

# Module Outline

#### • What is a Watershed?

- Watersheds in Arkansas
- How do Arkansans Use Watersheds?
- Principles of Watershed Hydrology
- Natural Watershed Functions and Features

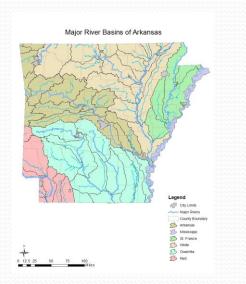

# **Arkansas River Basins**

- 6 Major River Basins
- Nearly 90,000 miles of streams and reservoirs

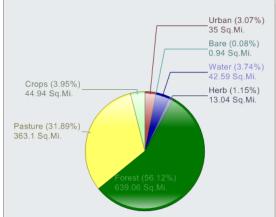

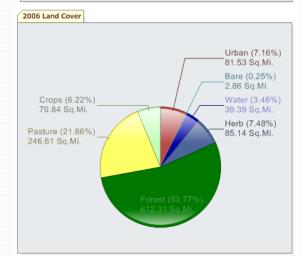

# Let's Learn More About Lake Conway-Point Remove

#### Chapter 4: Managing to Improve Watershed Function

## So What Happens Now?

#### Chapter 5

This is where you all come in....and everyone else of course

# Workshops

| Watershed                   | Date     | Location                                | Number of<br>Participants |
|-----------------------------|----------|---|---------------------------|
| Strawberry                  | 12-12-13 | Ozarka College                          | 25                        |
| Ouachita-Smackover          | 1-16-14  | El Dorado - Union County<br>Fairgrounds | 30                        |
| Upper Saline                | 2-12-14  | Bryant - Bryant Center                  | 8                         |
| Bayou Bartholomew           | 2-27-14  | Star City                               | 12                        |
| Lake Conway/Point<br>Remove | 3-14-14  | Morrilton                               | 34                        |
| L'Anguille River            | 3-19-14  | Jonesboro                               | 13                        |
| Poteau River                | 4-23-14  | Ft. Smith                               | 3                         |
| Cache River                 | 6-30-14  | Newport                                 | 20                        |
| Total Attendees             |          |   | 145                       |

# Feedback

| Question   | Strawberry  |             | Ouachita-Smackover |          |
|--|-------------|-------------|--------------------|----------|
|  | Pre         | Post        | Pre                | Post     |
| I know what a watershed is/does (% of Yes Answers)                           | 84          | 100         | 52                 | 100      |
| I know how I can protect my watershed (% of Yes                              | 79          | 100         | 33                 | 100      |
| Answer)  |             |             |                    |          |
| Correctly Identify Watershed Definition                                      | 79          | 77*         | 75                 | 94       |
| Correctly Identify Watershed Function  | 74          | 92          | 65                 | 77       |
| Correctly Identify Sources of nonpoint source pollution                      | 42          | 92          | 59                 | 82       |
| Identify practices that protect or improve water quality                     | 63          | 92          | 26                 | 63       |
| Correctly define critical groundwater area                                   | 63          | 85          | 68                 | 81       |
| Correctly define Best Management Practice                                    | 90          | 100         | 87                 | 100      |
| Correctly define watershed stakeholder                                       | 95          | 100         | 96                 | 100      |
| Correctly define watershed approach  | 100         | 92*         | 95                 | 100      |
| *Possible drop may indicate difference in sample size as so survey but left. | ome partici | pants chose | e not to take 1    | the post |
